

## Figures

Figure 1: A diagram illustrating the structure of a molecule, showing a central core with various substituents and functional groups.

FIG. 1 is a block diagram of a system for providing a simplified page to a user. The system includes a user (1) who interacts with a voice browser or small screen device (8). The device (8) sends an HTTP request (9) to a proxy server (2). The proxy server (2) contains a difference processing module (4) and a cache database (5). The proxy server (2) sends an HTTP request (10) to a web server (3). The web server (3) contains a target page (6) and an adjoining page (7). The proxy server (2) also receives a simplified page (8) from the user (1).

FIG. 15 is a flowchart illustrating a process for generating a difference page (HTML) from a target page (DOM) and a difference page (DOM).

Fig. 15

Figure 16: A diagram showing a sequence of events or processes. It consists of a series of small, stylized icons or symbols arranged in a horizontal line, possibly representing a timeline or a flowchart. The icons are small and difficult to discern, but they appear to be related to the content of the figure.
